

TAMP: Site Description Form

Please complete the Site Description Form to document the listening stops along your TAMP calling survey route. The miles should be cumulative from Stop 1. Include directions from stop-to-stop, mentioning roads passed, turns to make, and any special landmarks that would assist someone else in locating the listening stops. Also include a brief description of the habitat at the listening stop (such as pond on left or flooded woods on right, etc.). If Stop 1 is not at an intersection, then please use the Notes section to provide additional directions and mileage to locate Stop 1 from the nearest intersection or obvious landmark.
